MAHESH NANDIGAM

Hyderabad, Telangana | P: +91 7989281078 | nandigammahesh595@gmail.com | GitHub | LinkedIn

SUMMARY

Dedicated Full Stack Developer (MERN/C++) with a proven ability to build scalable software under pressure. Recognized as a 7x Hackathon Winner, IIT Hyderabad runner-up, and top 6% globally in Google PromptWars. Active CNCF open-source contributor (Meshery) seeking to drive impact in Google Summer of Code 2026.

SKILLS

Programming Languages: JavaScript, TypeScript, C++, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Bootstrap, Mongoose
Tools & Technologies: MongoDB, Docker, Kubernetes, Git, GitHub, Postman, CI/CD Pipelines
Achievements: 7x Hackathon Winner, 2nd Place at IIT Hyderabad, Top 6% Globally in Google PromptWars, Open Source Contributor (Meshery)

WORK EXPERIENCE

Integral Cup (STEM) — Remote
UI/UX Developer — April 2026 - June 2026

- Designed 15+ interactive prototypes in Figma, reducing developer hand-off time by 35% through highly organized component libraries and design tokens.
- Overhauled the mobile navigation flow, which lowered mobile user bounce rates by 25% and made the platform feel significantly more responsive.
- Optimized heavy visual assets (SVGs, web fonts, CSS), speeding up the landing page loading times by 30% for visitors on slower connections.

Open Source Contributions (Meshery) — Remote
GitHub Contributor — May 2026 – Present

- Engineered solutions within the CNCF Meshery repository, authoring and successfully merging 10+ pull requests to patch visual bugs and improve dashboard features.
- Refactored core CSS layout components, resolving 5+ long-standing flexbox layout bugs and improving load times by 20% for users.
- Collaborated on GitHub with 50+ developers to review code and maintain UI guidelines.

PROJECTS

HirePanel.ai – Autonomous Agentic AI Hiring Committee [GitHub] | [Video Demo] — May 2026

- Built a multi-agent AI platform using React, FastAPI, and Llama-3 (Groq API) to autonomously parse PDF resumes and evaluate candidates against job descriptions in under 30 seconds.
- Designed a dynamic workflow where specialized AI personas (Tech Lead, HR Partner) cross-examine candidate evidence and debate organizational fit to generate unbiased executive summaries.

Ecosphere - AI-Powered Sustainability Platform [GitHub] | [Live App] — June 2026

- Developed an interactive, gamified carbon footprint platform using vanilla ES6 JavaScript and Supabase (PostgreSQL), featuring a dynamic SVG ecosystem that physically reacts to user habits.
- Integrated Google's Gemini 2.5 AI API to serve as an intelligent eco-coach, and successfully deployed the scalable, Dockerized application to Google Cloud Run.

AlertGrid AI - Emergency Command & Intelligence System [GitHub] | [Live App] — June 2026

- Architected a mission-critical emergency response platform using Next.js 14 and Firebase to aggregate real-time institutional incident data into a centralized command dashboard.
- Engineered an automated dispatch pipeline integrating Google Gemini Pro for tactical threat analysis and the Twilio Voice API to instantly deploy specialized field responders during high-stress events.

EDUCATION

CMR COLLEGE OF ENGINEERING AND TECHNOLOGY — Hyd, TG
Bachelor of Technology in Computer Science & Machine Learning (CSM) — Expected June 2029
Cumulative GPA: 7.95/10
